TRANSPLANTING STOCK

No. 3 Plants

A favorite grade for lining out. Tied in bundles of 25 plants, per bundle, 75c.

This includes all plants too light for No. 1 grade or No. 2 grade and sold "conditional," as it sometimes happens we do not get any No. 3 plants in grading a variety.

MULTIPLES OF TEN

Under no circumstances can we book less than 10 of a variety. Order in multiples of ten, please.

WHOLESALE ONLY

Please do not hand prices to parties not entitled to them.

TERMS

Prices f. o. b. Hemet, California. All bills due 60 days from date. Boxes charged at minimum rates.

Orders from unknown correspondents must be accompanied by cash or satisfactory reference.

Sales made subject to stock being unsold when order is received or loss by any and all unavoidable causes.

I exercise care to keep varieties true to name and hold myself in readiness at all times to replace, on proper proof, all stock that may prove otherwise; but it is mutually agreed between the purchaser and myself that I shall not at any time be liable for any amount greater than the original price of the stock.

Stock can usually be handled by Christmas time. To enable us to handle the output while dormant, we dig only one variety at a time for all aggregate orders, therefore, it is impossible to ship full assortments early in the digging season.

GRADES

XX—Very stocky and strong, heavily rooted. Are cut to 30 inches of wood when packed.

No. 1.—Hybrid Perpetuals and Climbers graded 24 to 30 inches of wood. Teas, Hybrid Teas, etc., graded 18 to 24 inches of wood. All plants stocky and well rooted. Cut to 24 inches of wood when packed.

No. 2.—Hybrid Perpetuals and Climbers graded 18 to 24 inches of wood. Teas, Hybrid Teas, etc., graded 12 to 18 inches of wood. All plants stocky and well rooted. Cut to 18 inches of wood when packed.

ABBREVIATIONS

C.—Cherokee.	N.—Noisette.
Cl. T.—Climbing Tea.	Pol.—Polyantha.
Cl. H. T.—Climbing Hybrid Tea.	H. P.—Hybrid Perpetual.
H. T.—Hybrid Tea.	T.—Tea.

CHAS. HOWARD

HEMET, CALIFORNIA

AGGRIPPINA (B.)—An old, well-known sort. Pretty in growth; best of foliage. Very profuse bloomer; color, dark red; lasting and fragrant; splendid for bedding or a hedge.

ARCHDUC CHAS (B.)—The best one of the Bourbon Roses for the Pacific Coast. Strong, upright growth, free from disease. Bright red, changeable to pink and white—three colors sometimes found on same bush.

BESSIE BROWN (H. T.)—This is a new Rose which pleases every one who has seen it in bloom. Of strong, vigorous, upright growth, good foliage and one of the heaviest bloomers. Color, white, tinged flesh; flower very large, extremely full and double, of great substance, and fragrant.

CLOTHILDE SOUPERT (P.)—The best known and most popular of the Polyantha. It is a blooming Rose and the flower is the largest of its class. The full double flowers are produced in sprays of three or more and are of the finest imaginable form; the outer petals are pearl white, shading to a center of rosy pink.

DOCTEUR GRILL—Clear buff pink, passing to rose and fawn, elegantly suffused with canary yellow. Very fine variety for the garden.

DOROTHY PERKINS—An exceedingly hardy garden Rose, standing a temperature of 20 below zero. A cross between the Wichuriana and Mme. G. Luizet; much like Crimson Rambler in habit; color, clear shell pink; fragrant.

DOUBLE CHEROKEE—This grand climbing variety has same bright, waxy green foliage as the well known single Cherokee. Pure white double flowers and is easy to transplant.

DUCHESS DE BRABANT (T.)—One of the persistent bloomers in the Rose family; foliage and wood of light green, quite distinct; a thrifty grower and not subject to disease. Flowers cup-shaped; color a lovely shade of rosy flesh, deepening to bright rose; petals delicate and wax-like, nearly transparent. Very popular and largely planted.

G. NEBANNOND (T.)—Semi-double flowering, color pink shaded to copper yellow. Extra fine buds and splendid keeper. A strong grower, giving long stems like Maman Cochet, and especially adapted for fall blooming.

GENERAL McARTHUR—Seedling from Marquis de Litta. A free-branching, vigorous and healthy variety, showing clean, glossy foliage. Like Maman Cochet, its vigor makes it the "rose for the people." Color crimson scarlet, flowers early and late and fragrance superb. The grandest red Rose for the Pacific Coast.

GRUSS AN TEPLITZ (Greeting of Teplitz)—One of the best new bedding Roses. Color bright scarlet, shading to velvety crimson and is never "out of bloom."

HOMER—Beautiful folded buds of a light rose color; often peculiarly spotted with white; a fine bedder; very handsome and distinct.

MME. ABEL CHATENAY (H. T.)—A grand Rose on account of its fine growing qualities, hardness and freedom of bloom, it makes a valuable garden sort. Flowers of good size and beautifully shaped and moulded; the buds are exquisite; the color is a beautiful creamy rose shaded with rose vermilion and tinged with salmon; the base of petals being highly colored.

MARY WASHINGTON—Pure white flowers of medium size, blooming profusely in large clusters throughout summer; a strong, upright grower; fragrance slightly flavored with musk.

METEOR (H. T.)—This valuable variety is well known in most every garden. It is one of the brightest colored deep red Roses in existence. It is a rich, dark velvety crimson color, generally in full flower when many prized sorts are doing but little; healthy and free from mildew; flowers double and compact and borne on good, long stems, especially adapted for cutting. It requires heat and plenty of it. The flowers are truly grand.

PERLE D'OR (Pol.)—Vigorous free flowering Polyantha. Color bright orange yellow. Good companion for Mme. Cecil Brunner.

RAGGED ROBIN (Gloire des Rosomanes)—Brilliant crimson, semi-double, constant bloomer and very fragrant. Just the thing for hedge row.

SEVEN SISTERS (Mu't.)—A climbing strong growing variety, crimson changing to variable lighter shades.

STRIPED LA FRANCE—Color same as the beautiful pink La France, except delicate stripes and shades of white. Otherwise the equivalent of its parent.

WHITE BANKSIA (Banksia)—Well known, distinct and valuable as a rapid growing climber; valuable for covering arbors, ragged hedges, walls, trunks of trees; thornless; flowers white and very small but borne in great profusion.
